Subject Index

A

Air traffic control, enroute sector capacity model, 299–307
Air traffic management, global flow control problem, dynamic programming framework for, 308–313
Airline yield management, optimization and estimation problems, 245–246
Algorithm
  consistent itinerary flows, 225–239
  facility location problem, 183–187
  hierarchical network design problem, 175–182
  m given demand points, hemisphere, 91–97
  network design, using stoachastic incremental traffic assignment approach, 215–224
  optimal, weighted minimax flow centers on trees, 314–316

B

Bibliographic section, 169–174, 317–321
Bus feeder services, optimization models for comparing conventional and subscription, 281–298

C

Capacitated traveling salesmen location problem, 9–18
Container ships, routing, using Lagrangean relaxation and decomposition, 201–214

D

Demand points, *m*, determination if on hemisphere, 91–97
Disposal of hazardous wastes, simultaneous siting and routing in, 138–145
Dissertation prize competition, Transportation Science Section, abstracts, 245–255
Distance, average, distribution systems, 83–90

E

Emergency vehicle base location, 264–280
En route sector capacity model, 299–307
Equilibrium
  behavior of Markovian network processes, 251–252
  paradoxes, traffic, 240–244
Euclidean case, optimal points to Weber problem, 3–8

F

Facility location problem, with limited distances, 183–187
Flammable liquids in bulk, highway transportation of, 115–123
Fleet sizing and vehicle location, model, 19–45

G

Global flow control problem, air traffic management, dynamic programming framework for, 308–313

H

Hazardous materials
  equitable sequencing of set of shipments, 124–137
  flammable liquids in bulk, highway transportation risk, 115–123
  integrated network/planar multiobjective model for routing and siting, 146–156
  liability rules in transportation of, 157–168
  transportation, risk analysis, routing/scheduling and facility location, 100–114
  simultaneous siting and routing in disposal of wastes, 138–145
Hemisphere, determination of *m* given demand points, 91–97
Heuristic
  capacitated traveling salesmen location problem, 9–18
  equitable sequencing of given set of hazardous materials shipments, 124–137
  locating emergency vehicle bases, 264–280
  simultaneous origin-destination assignment and vehicle routing problem, 188–200
Hierarchical network design problem, 175–182

I

In memoriam, Leslie C. Edie, 1914–1990, 1–2
Inventory/routing problems, period and phase of customer replenishment in, 253–255
Itinerary flows, consistent, algorithm for calculating, 225–239

J

Jamarat bridge, modeling of pedestrian flow on, 257–263

L

Lagrangean relaxation and decomposition, routing container ships using, 201–214
Liability rules and hazardous materials transportation, 157–168
Limited distances, facility location problem with, 183–187

M

Model
  air traffic management, 308–313
  average distance results, 83–90
  capacitated traveling salesmen location problem, 9–18
  emergency vehicle base location, 264–280
  en route sector capacity, 299–307
  fleet sizing and vehicle location, 19–45
  hazardous materials transportation, 100–114
  liability rules and hazardous materials transportation, 157–168
  network/planar approach to routing and siting, 146–156
  optimization, comparing conventional and subscription bus feeder services, 281–298
  pedestrian flow on Jamarat bridge, 257–263
  routing of container ships, 201–214
  routing/siting, hazardous waste disposal, 138–145
  simultaneous origin-destination assignment and routing problem, 188–200
  stops and delay for semi-actuated signals, 65–82
  traffic equilibrium paradoxes, 240–244
  weighted minimax flow centers on trees, 314–316
Multicommodity network flow problems, primal partitioning solution for, 246–248

N

Network
  approximation, fleet sizing and vehicle location, model, 19–45
  design algorithm using stochastic assignment, 215–224
  design problem, hierarchical, new formulation and solution procedures, 175–182

O

Optimal points, to Weber problem, set of, 3–8
Origin-destination, simultaneous, assignment and vehicle routing problem, 188–200

P

Pedestrian flow, Jamarat bridge, 257–263

R

Rail operations, tactical scheduling, SCAN I system, 46–64
Railroad on-time performance, improving, models, algorithms and application, 249–251
Rectilinear case, optimal points to Weber problem, 3–8

Risk assessment, highway transportation of flammable liquids in bulk, 115–123
Routing multiple container ships, 201–214

S

SCAN I system, tactical scheduling of rail operations, 46–64
Semi-actuated signals, stop probability and delay estimations, 65–82
Stochastic incremental traffic assignment, network design algorithm, 215–224
Subscription and conventional bus service, 281–298

T

Tactical scheduling of rail operation, 46–64
Traffic equilibrium paradoxes, 240–244
Traffic signals, stop probability and delay estimations at low volumes for semi-actuated, 65–82
Traveling salesmen location problem, capacitated, 9–18

V

VAMAP, vector median model, 264–280
Vehicle routing problem, simultaneous origin-destination assignment, 188–200

W

Warehouse location
under multiple transportation options, 252–253
with service-sensitive demand, 248–249
Weber problem, on set of optimal points to, 3–8
Weighted minimax flow centers in trees, 314–316

Statement of Ownership, Management and Circulation
(Required by 39 U.S.C. 3685)

1A. Title of Publication	1B. PUBLICATION NO.	2. Date of Filing
TRANSPORTATION SCIENCE	8 9 7 6 4 0 0 0	10-1-91
3. Frequency of Issue	3A. No. of Issues Published Annually	3B. Annual Subscription Price
Quarterly	4	$15.00

4. Complete Mailing Address of Known Office of Publication (Street, City, County, State and ZIP+4 Code) (Not printers)
Mount Royal and Guilford Avenues, Baltimore, Maryland 21202, USA

5. Complete Mailing Address of the Headquarters of General Business Offices of the Publisher (Not printer)
Ount Royal and Guilford Avenues, Baltimore, MD 21202 USA

6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor (This item MUST NOT be blank)
Publisher (Name and Complete Mailing Address)
Operations Research Society of America, Mount Royal & Guilford Ave. Balt. MD 21202-3993
Editor (Name and Complete Mailing Address)
Mark S. Daskin, Dept of Civil Eng.
Northwestern Univ., Evanston, IL 60208
Managing Editor (Name and Complete Mailing Address)
N/A

7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)

Full Name	Complete Mailing Address
Operations Research Society of America	Mount Royal and Guilford Avenue Baltimore, MD 21202, USA

8. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages or Other Securities (If there are none, so state)

Full Name	Complete Mailing Address
NONE	

9. For Completion by Nonprofit Organizations Authorized To Mail at Special Rates (DMM Section 424.12 only)
The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes (Check one)
(1) [X] Has Not Changed During Preceding 12 Months (2) [ ] Has Changed During Preceding 12 Months
(If changed, publisher must submit explanation of change with this statement.)

10. Extent and Nature of Circulation (See instructions on reverse side)	Average No. Copies Each Issue During Preceding 12 Months	Actual No. Copies of Single Issue Published Nearest to Filing Date
A. Total No. Copies (Net Press Run)	1985	1967
B. Paid and/or Requested Circulation 1. Sales through dealers and carriers, street vendors and counter sales *SEE BELOW	72	75
2. Mail Subscription (Paid and/or requested)	1289	1386
C. Total Paid and/or Requested Circulation (Sum of 10B1 and 10B2)	1361	1461
D. Free Distribution by Mail, Carrier or Other Means Samples, Complementary, and Other Free Copies	NONE	NONE
E. Total Distribution (Sum of C and D)	1361	1461
F. Copies Not Distributed 1. Office use, left over, unaccounted, spoiled after printing	624	506
2. Return from News Agents	NONE	NONE
G. TOTAL (Sum of E, F1 and 2—should equal net press run shown in A)	1985	1967

11. I certify that the statements made by me above are correct and complete
Signature and Title of Editor, Publisher, Business Manager, or Owner
Patricia A. Morrin Executive Director
